NEWSLETTER

VOL. 05

CLASSROOM IMPACT

Students have been working consistently through the water quality unit, learning about the importance of tight regulations and frequent testing.

Students at The Food Project and For my Kidz have also engaged with the material through art (see picture above and left).

UPCOMING PLANS

The Seedling team plans to wrap up the academic year soon, doing so with a few final units and an overview of the content learned this year.

CHEF ACTIVITIES

Our teachers pre-cut mangos for the Green Street Academy (GSA) and packaged them to share with students. It was a blast getting to share the sweet treat with everyone.
