

MARCH 2023

# SEEDLING

## NEWSLETTER

VOL. 03

## 2D DRAWINGS OF 3D OBJECTS

Students practiced portraying 3D objects from various angles in the Computer-Aided Design lesson. One student did a great job depicting a pencil sharpener.

## CLASSROOM IMPACT

In the past two weeks, students have delved into water quality, nutrients, and an introduction to Computer-Aided Design (CAD).

Students at For My Kidz continued to observe their hydroponics systems, which have sprouted! Students have been logging their weekly observations and questions about the relationship between nutrients and growth.

## UPCOMING PLANS

The Seedling Curriculum will continue to build upon the students' understanding of water quality and nutrients.
