Future Plans

Seedling will continue to expand our offerings in curriculum to more schools in the coming year. We hope to inspire students to learn about important topics in sustainability and food science, while also encouraging students to practice healthier lifestyles in their homes. The addition of entrepreneurship, CAD and Arduino programs will also provide tangible real world-skills.

New Schools!

Seedling is pleased to begin teaching at several schools during this fall semester.

- Green Street Academy
- Northbay Academy
- Food Project
- For My Kidz

Improved Curriculum

Seedling's Curriculum consists of eight units spanning the entire school year.

1. Food Science
2. Growing Plants and Hydroponics
3. Food Systems
4. Nutrients
5. Water Quality
6. Computer Aided Design
7. Entrepreneurship
8. Arduino
